

	<b>Experiment title:</b> BAG CBS Montpellier	<b>Experiment number:</b> MX-536
<b>Beamline:</b> ID 14-3	<b>Date of experiment:</b> from: 27th to: 28 <sup>th</sup> September 2007	<b>Date of report:</b>
<b>Shifts:</b> 3	<b>Local contact(s):</b> Dr Ganesh NATRAJAN	<i>Received at ESRF:</i>
<b>Names and affiliations of applicants (* indicates experimentalists):</b> Hoh f.		

#### **P14-AKT2 complex**

10 xl were tested with good shape but very poor diffraction

#### **Phytase**

-20 xl of Phyt-6sulfate-inositol complexes or Mono phosphate -inositol complexes tested. 5 datasets collected. No ligand visible

#### **P3**

50 xl were tested. 3 datasets around 3 A were collected.

#### **BCL-inhibitor**

48 xl of complexes with 4 different inhibitors tested. A total of 11 datasets of the different complexes were collected (resolution around 2 – 2.5 A). After resolution by MR and refinement, no inhibitor was visible.

#### **MOMP**

10 XL tested. 1 dataset at 5 A collected
