## EUROPEAN SYNCHROTRON RADIATION FACILITY

## **STANDARD EXPERIMENT**

## **CONFIDENTIAL REPORT**

Experiment title:	Experiment number:	
High pressure chemistry of low-Z pnictogen elements: increased coordination of Phosphorus by	CH-5254	
Nitrogen atoms and synthesis of new PN chemical		
structures		

Main-Proposer:

**CEPPATELLI Matteo** 

Beamline and dates of experiment:

21 to 24 February 2018 – 9 shifts on ID27

A confidential report was submitted for this experiment; it was sent to the User Office on 1st March 2018
