

	Experiment title: Structure of the photoreceptor phytochrome	Experiment number: LS-1466 block allocation
Beamline: ID14 3	Date of experiment: from: 26 Aug. 99 to: 27 Aug. 99	Date of report: 25.02.2000
Shifts: 1.5	Local contact(s): Steffi ARZT	<i>Received at ESRF:</i>
Names and affiliations of applicants (* indicates experimentalists): J. Labahn*, J. Granzin*, G. Büldt Forschungszentrum Jülich, IBI-2, Biologische Strukturforschung, D-52428 Jülich, GERMANY		

Report:

Several crystals had been tested frozen under different conditions. The diffraction pattern showed very high mosaicity e.g. spot splitting. No data suitable for structure solution could be collected.
