

ESRF

Experiment title: X-Ray Structure Analysis of the Membrane Protein Complex Fumarate Reductase from *Wollinella succinogenes*

Experiment number:

LS-426

Beamline:

BM14-BL19

Date of experiment:

from: 05-JUN-96 to: 07-JUN-96

Date of report:

7 June 1996

Shifts:

6

Local contact(s): A. Thompson

Received at ESRF:

14 JUN 1996

Names and affiliations of applicants (* indicates experimentalists):

C. Roy D. Lancaster* Max-Planck-Institut für Biophysik, Heinrich-Hoffmann-Str.7,
D-60528 Frankfurt am Main, Germany

Manfred Auer EMBL, Meyerhofstr. 1, D-69102 Heidelberg, Germany

Hartmut Michel Max-Planck-Institut für Biophysik, Heinrich-Hoffmann-Str.7,
D-60528 Frankfurt am Main, Germany

Report:

During this second set of six shifts allocated to LS-426, no data was collected in spite of our presence at the beamline. This was due to a water leak on the monochromator crystal discovered shortly before the scheduled start of our measurements. Despite intensive efforts of our local contact to fix the problem, this was not accomplished during the scheduled duration of our experiment.
