

Coherent X-ray diffraction imaging of nanoengineered polymeric capsules

S. Erokhina, L.Pastorino, D.Di Lisa, A.G.Kiiamov, A.R. Faizullina, D.A. Tayurskii, S. Iannotta, V. Erokhin

For the first time nanoengineered polymeric capsules and their architecture were studied with coherent X-ray diffraction imaging technique. The use of coherent X-ray diffraction imaging technique allowed us to analyse the samples immersed in a liquid. We report about the significant difference between polymeric capsules architecture in dry and liquid conditions.
