

	Experiment title: Van der Waals-bound graphene/h-BN heterostructures as studied by grazing incidence x-ray diffraction	Experiment number: HC-3222
Beamline: BM25B	Date of experiment: from: 08.12.2017 to: 13.12.2017	Date of report: 26.02.2018
Shifts: 15	Local contact(s): Dr. Rosalía Cid Barreno	<i>Received at ESRF:</i>
Names and affiliations of applicants (* indicates experimentalists): Dr. Michael Hanke* Paul-Drude-Institut, Hausvogteiplatz 5-7, 10117 Berlin Dr. Martin Schmidbauer* Institut für Kristallzüchtung, Max-Born-Str.2, 12489 Berlin		

Report:

Since the results of HC-3222 are part of a manuscript, which is close to submission to a highly ranked journal, we have sent the report to the ESRF user office and asked to treat it in a confidential way, thus, of course making it accessible for members of the review panel but not through the SMIS user portal.
